

Version: 0.2.0

RPlus Android Library

Getting Started

Installation

1. Put **rplus_android** dir on your project root path
2. Add the maven local repository to project build.gradle or settings.gradle in the any way of following:

```
dependencyResolutionManagement {
    repositories {
        maven {
            url "file:///${rootProject.projectDir}/rplus_android/"
        }
    }
}
```

or

```
allprojects {
    repositories {
        maven {
            url "file:///${project.rootDir}/rplus_android/"
        }
    }
}
```

3. Add dependency to app gradle file

```
dependencies {
    implementation("com.lotusflare.rplus:rplus-android:0.2.0")
}
```

How To Use

1. Import the class

```
import com.lotusflare.rplus.RPlusSDK
```

2. Use the method to start rplus flow

```
/**
 * Start rplus
 * @param context applicationContext for start rplus
 * @param clientId rplus client id
 * @param clientKey rplus client key
 * @param userAuth rplus userAuth
 * @param onSuccess success callback
 * @param onError error callback
 * @returns Unit
 */
fun startRPlus(
    context: Context,
    clientId: String,
    clientKey: String,
    userAuth: String,
    onSuccess: (Boolean) -> Unit,
    onError: (Error) -> Unit
)
```

Example for start plus flow

```
val context = this.applicationContext
val clientId = "xxx"
val clientKey = "xxx"
val userAuth = "xxx"
RPlusSDK.startRPlus(context, clientId, clientKey, userAuth, onSuccess = { }, onError = { })
```
