

Version: 0.1.0

# RPlusIOSLibrary

---

## Installation

1. Copy the **RPlusIOSLibrary** folder to your project's root path.
2. Add the dependency in Podfile:

```
pod 'RPlusIOSLibrary', :path => '../'
```

3. Run `pod install`

## How To Use

### Import the library

```
import RPlusIOSLibrary
```

### Use the method to start rplus flow

```
let config = RPlusConfiguration.configuration
config.clientId = "xxx"
config.clientKey = "xxx"
config.userAuth = "xxx"
RPlusManager.shared.startRPlus(withConfig: config) { _, error in
    if let error { print("Error: \(error.description)") }
}
```
