Version: 0.1.0

RPlus Android Library

Getting Started

Installation

1. Put **rplus_android** dir on your project root path
2. Add the maven local repository to project build.gradle or settings.gradle in the any way of following:

```
dependencyResolutionManagement {
        repositories {
            maven {
                url "file:///${project.rootDir}/rplus_android/"
            }
        }
}
```

or

```
allprojects {
    repositories {
        maven {
            url "file:///${project.rootDir}/rplus_android/"
        }
    }
}
```

3. Add dependency to app gradle file

```
dependencies {
    implementation("com.lotusflare.rplus:rplus-android:0.1.0")
}
```

How To Use

1. Import the class

```
import com.lotusflare.rplus.RPlusSDK
```

2. Use the method to start rplus flow

```
RPlusSDK.startRPlus(context, clientId, clientKey, userAuth)
```

Method Reference

```
    /**
     * Start rplus
     * @param clientId rplus client id
     * @param clientKey rplus client key
     * @param userAuth rplus user auth
     * @returns Unit
     */
    fun startRPlus(context: Context, clientId: String, clientKey: String,
userAuth: String)
```
